REFILLABLE PENS FOR RADIO SHACK PC-2 & SHARP PC-1500 PRINTERS.

Tired of buying new sets of pens? You can refill the ones you have. Tired of taking them out of the printer and capping them and then uncapping and putting them back in the printer? Just refill your pens and leave them in the printer for days, weeks, or months, depending on use. Remove them when they need to be refilled. The inks do not dry out in the pens. Each of the four colors delivers very pleasing & densely colored prints & graphs. The black & blue inks are also waterproof.
Everything you need to convert and refill them is available at your local stores. For detailed instructions send $4.00. Make check payable to:

PENREF
PO Box 11024
Rock Hill, SC 29731-1024

Be sure to include your address.

IF YOU HAVE A SHARP PC-1500 OR A RADIO SHACK PC-2

WE HAVE SOME REAL POWER FOR YOUR PC

USONICS is offering a modification that will put real power into your PC. The U-12 modification will add 10,240 free bytes of memory to the already existing 1850 bytes, giving you a total of 12,090 free bytes of memory.

The U-12 memory starts at address 4000 HEX and ends at 6FFF HEX. Since the 40 pin expansion port in the back of the unit is undisturbed you can still install any of the Sharp ROM software modules and have real headroom to work with. Installing the 8K battery backed CE-159 module you will have a powerful 20,282 free bytes of memory. This fall when Sharp releases its 16K battery backed CE-161 your PC will have a total of 28,474 free bytes of memory. With this kind of power your data base program can become a real work horse.

There are four versions of the USONICS U-12 modification to fit your budget. Since the Usonics U-12 uses address space 4000 HEX and above, the 4K CE-151 and 8K CE-155 are no longer usable, the U-12A and U-12C modifications become a money saving bargain.

Please send # of units

_____ U12A using your PC and your CE-155 ..... @ **$120.00**

_____ U12B using your PC which we modify ..... @ **$165.00**

_____ U12C using your CE-155 8K module which we modify and install into a new PC ..... @ **$305.00**

_____ U12D a new modified PC-1500 ..... @ **$350.00**

☐ Please send me more information on the above modification.

☐ Please send me information on the USONIC bar code reader for the PC-1500 and PC-2 (availability November 1983).

PRACTICAL APPLICATIONS

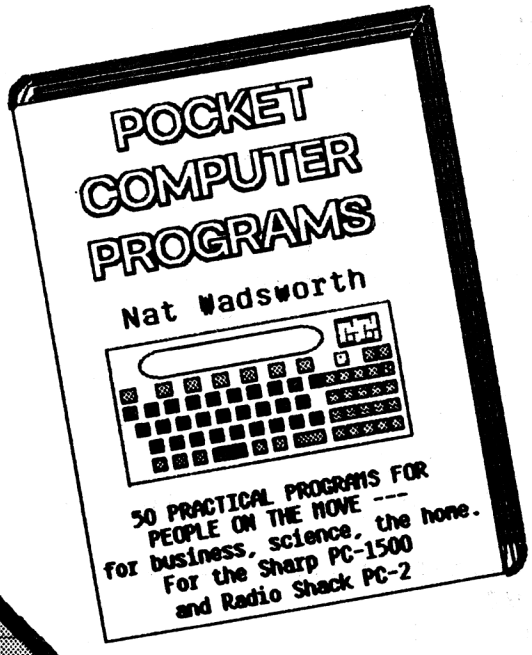
Programs for your Pocket Computer

A superb collection of programs specifically tailored for PC-2 and PC-1500 owners. Here is how the publisher, **Hayden Book Company, Inc.**, describes this new book:

"Use your pocket computer to get the edge in business, keep track of home activities, make engineering calculations -- or while away a quiet moment with a game of pocket Blackjack or Hunt the Wumpus. You can even teach your pocket computer to play Bach.

Here are 50 thoroughly tested, ready-to-run programs written by experts throughout the world and compiled by the editor of the ***POCKET COMPUTER NEWSLETTER***. Here's just a sample: Business programs keep personal calendars, calculate amortizations, monitor trip expenses, calculate payroll taxes. Math programs convert numbers to any base, solve polynomials and simultaneous equations. . . even do regression analyses. Engineering programs do fast Fourier transforms, design electronic filters, fit curves, plot histograms. Home and entertainment programs keep shopping lists straight, take memos, and play Hangman or Tic-Tac-Toe -- or even Prelude II from the Well Tempered Clavier. And much, much more.

Each application includes an introduction by the author, a complete program listing, and a sample run. These programs have been tested on the Sharp PC-1500 and Radio Shack PC-2. Some programs may require a printer/plotter or a memory expansion module."



HOW TO ORDER THE *POCKET COMPUTER PROGRAMS* BOOK BY MAIL

You may send in your order on this coupon. Please enclose payment. Note that prices include shipping by method of our choice. We normally ship by first class mail in the United States, Canada and Mexico. Air mail is used elsewhere.
